PROMENET Gains Websense Platinum Partner Status

- Recognizing PROMENET as a leading provider of network integration services.
- The highest level of accreditation available, as a result of our technical skills and commitment.

PROMENET, the experts for networking and internet services, has been awarded Platinum Partner status by Websense, Inc., the worldwide leader in Internet Security. This new level of status from Websense recognizes PROMENET as a center of excellence for Websense solutions, strong year-on-year business growth and for embracing new technologies and product sets from Websense.

Platinum solution providers offer the broadest range of knowledge to their customers, and PROMENET has demonstrated its commitment to providing customers with exceptional services and technical competence based on all Websense security products and technologies.

John Papaioannou, CEO and President of PROMENET, Inc. said: "PROMENET is honored to be named as a Platinum Partner to Websense. This will greatly benefit PROMENET's customers through direct contact for problem solving and early access to new innovations. It recognizes PROMENET's leading position in the market for providing excellent network security solutions and services to companies in the New York City Tri-State area."

About PROMENET

PROMENET along with Websense Inc., a worldwide leader of employee Internet management solutions, offer internet security solutions that enable businesses to monitor, report and manage how their employees use the Internet. The main objective in implementing a secure internet solution is to support an organization's efforts to improve employee productivity, conserve network bandwidth and mitigate legal liability. PROMENET's System Engineers can work with you to determine what level of Internet management best suits your specific needs and implement the appropriate solution.
